## Passion for creativity

### About Me

I am a 30-year-old woman with a burning passion for creativity in all its forms. I live in Copenhagen with my boyfriend and our two lovely cats. I am a newly graduated multimedia designer from KEA, where I have loved delving into the world of video production, photography, and social media. For me, it's about creating visual aesthetics that captivate and fascinate the viewer.

My passion for art has always been an integral part of my life. After spending time at an art school, where I explored and developed my creative abilities, my education as a multimedia designer has provided me with the tools to apply these skills in a meaningful way.

In addition to my professional passion, I have a great love for animals, and I enjoy spending time on exercise and cooking. These interests give me balance and inspiration in both my personal and professional life.
